

Creating Your Own Political Party

Instructions:

Create a political party that represents the political issues that are most important to you. I am looking for political thought and creativity. You will post your project to our APGOPO Google Classroom, so it can be shared during class.

You must create a multi-media visual that outlines the platform of your party, your party's spokesperson and displays your symbol, logo, and any other relevant information. This can be a Prezi or a website or...

- A platform that includes five issues you support and underlying ideology that created them. Your issues should be specific and may be designated for a certain constituency.
- The spokesperson for your party with a rationale.
- The groups you expect to support your candidacy (section of society and interests groups).
